

## Hedgehog Hamburgers

*From <http://homehearth.virtualave.net/mooburger.html>*

A hedgehog is easily identified by the spines or hollow hairs that cover the surface of the body. The spines are used as a defense mechanism; when threatened, they tuck their legs and head inward to resemble a small, spiny ball.

### Ingredients:

- 1½ pounds ground beef
- 1 cup sour cream
- 2 tablespoons Worcestershire sauce
- 2 tablespoons onion, chopped
- 1½ salt
- 1½ cup corn flakes

### Directions

1. Combine the meat, sour cream, Worcestershire sauce, onion and salt.
2. Crush the corn flakes slightly with your hands.
3. Stir into meat mixture and shape into 8 patties, ¾-inch thick.
4. Broil about 5 minutes on each side, or until done to your liking. May be cooked in a skillet on top of the stove for approximately the same time.

**Serves: 8**
